

## IN THE CLAIMS

Please amend the claims as follows:

Claims 1-28 (Canceled).

Claim 29 (New): A film comprising, as sole layers,

(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier,  
and, optionally,

(2) at least one layer L2 comprising an aliphatic polyamide.

Claim 30 (New): The film according to claim 29, wherein said aromatic polyamide is  
a polyphthalamide.

Claim 31 (New): The film according to claim 30, wherein the polyphthalamide  
comprises from about 50 mole % to about 95 mole % hexamethylene terephthalamide units,  
from about 25 mole % to about 0 mole % hexamethylene isophthalamide units, and from  
about 50 mole % to about 5 mole % hexamethylene adipamide units.

Claim 32 (New): The film according to claim 29, wherein the impact modifier is a  
rubber.

Claim 33 (New): The film according to claim 32, wherein the rubber is a  
functionalized polyolefin-based rubber.

Claim 34 (New): The film according to claim 33, wherein the functionalized  
polyolefin-based rubber is a maleic anhydride functionalized styrene-ethylene-butylene-

styrene block copolymer or a maleic anhydride functionalized ethylene-propylene-diene monomer rubber.

Claim 35 (New): The film according to claim 31, wherein the impact modifier is selected from the group consisting of a maleic anhydride functionalized ethylene-propylene-diene monomer rubber, a maleic anhydride functionalized styrene ethylene-butylene-styrene block copolymer, and mixtures thereof.

Claim 36 (New): The film according to claim 29, wherein said layers are contiguous layers of the order  $[(L1)_n/(L2)_m]_x$  where x is any integer of 1 or greater, n is any integer of 1 or greater, and m is any integer.

Claim 37 (New): The film according to claim 29, wherein said layer L1 further comprises an external lubricant.

Claim 38 (New): The film according to claim 29, wherein said layer L1 further comprises a heat stabilizer comprising at least one copper (I) salt and at least one alkali metal halide.

Claim 39 (New): The film according to claim 29, wherein layer L1 further comprises an anti-oxidant.

Claim 40 (New): A method for making a film comprising, as sole layers,  
(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier,  
and, optionally,

(2) at least one layer L2 comprising an aliphatic polyamide,  
comprising extruding an aromatic polyamide and an impact modifier, and optionally  
extruding an aliphatic polyamide, into a film.

Claim 41 (New): The film according to claim 29, comprising, as sole layer(s), at least  
one layer L1.

Claim 42 (New): The film according to claim 41, comprising, as sole layer, one L1  
layer.

Claim 43 (New): The film according to claim 41, comprising, as sole layers, at least  
two L1 layers.

Claim 44 (New): The film according to claim 29, comprising, as sole layers, at least  
one layer L1 and at least one layer L2.

Claim 45 (New): The film according to claim 44, comprising, as sole layers, two  
layers, the first one being a L1 layer and the other one being a L2 layer.

Claim 46 (New): The film according to claim 45, wherein L1 is the inner layer.

Claim 47 (New): The film according to claim 45, wherein L1 is the outer layer.

Claim 48 (New): The film according to claim 44, which comprises, as sole layers, three layers of L1/L2/L1, wherein L1 is both an inner and outer layer and L2 is the intermediate layer.
